# Coolants

## Ice Sheets

The ice sheets remain flexible when frozen and will not stick together in the freezer. Our ice sheets are manufactured from food grade materials and only contain highly purified water, the contents are certified to be free from contaminants.

## Sorba-Freeze

Sorba-Freeze is a refrigerant blanket that helps to control temperature even above 2°C and it is extremely easy and safe to handle. Sorba-Freeze Refrigerant Pads ensure your products arrive at their final destination in the same condition as when they left your premises. The silver laminate not only looks stylish, but the pads are easy to use and provide excellent protection during transit. Inside each 'cell' is an acrylate polymer powder that is capable of absorbing liquid up to 150 times its own weight.

## Gel Packs

Gel Packs are strong and durable. They maintain a temperature of -6. Place them in freezer for 3/4 days prior to using, best results are when the gel packs are completely solid frozen. Gel Packs can be used with our Coolimate insulated shippers.

## Duration Ice Packs

Duration Ice Packs are filled with a special food grade phase change material, making them ideal for shipping frozen foods. The duration ice packs need to be frozen at a temperature of at least -23°C before use and must be completely frozen solid.

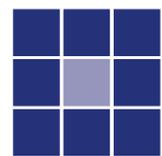

## Ice Packs

Our Ice Packs are heavy duty, high performance reusable pack for use with the Coolimate insulated shippers. The Ice Packs are available in 2 sizes as protection for chilled food and frozen food products during shipment.
