

Our Coolimate® PharmaFood Systems provide a high performance, money saving solution for shipping bulk temperature sensitive products.

High Performance Insulation

The black polyethylene foam liner has been designed to not only insulate, but will also protect your product from impact.

Size Matters

When it comes to shipping, size really does matter. With that in mind we engineered three sizes to cater to all of our customers needs.

Quick Assembly

All CooliMate PharmaFood Shippers come as a flat packed kit and they are ready to use as soon as your ice sheets are frozen.

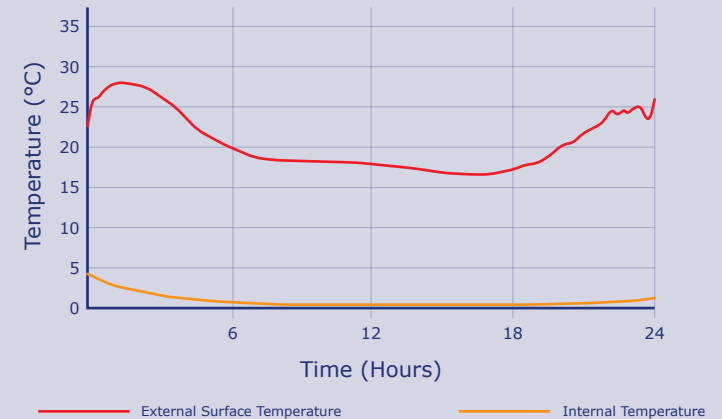

Temperature Range & Duration

Test results show that our CooliMate PharmaFood Systems can keep your perishable products chilled below +5°C for 24 hours

System Name	Internal Space (mm)	Payload (Litres)
CooliMate PharmaFood 240	240 x 240 x 200	12
CooliMate PharmaFood 310	310 x 310 x 250	24
CooliMate PharmaFood 430	430 x 430 x 250	46.2

24 Hour Test Results

Insulation

Closed Cell Polyethylene Foam

Nominal Density - 30Kg/m²

Thermal Conductivity - 0.05W/mK

Thermal Stability - < 2%

Water Absorption - < 3%
